

Allevo Koodai

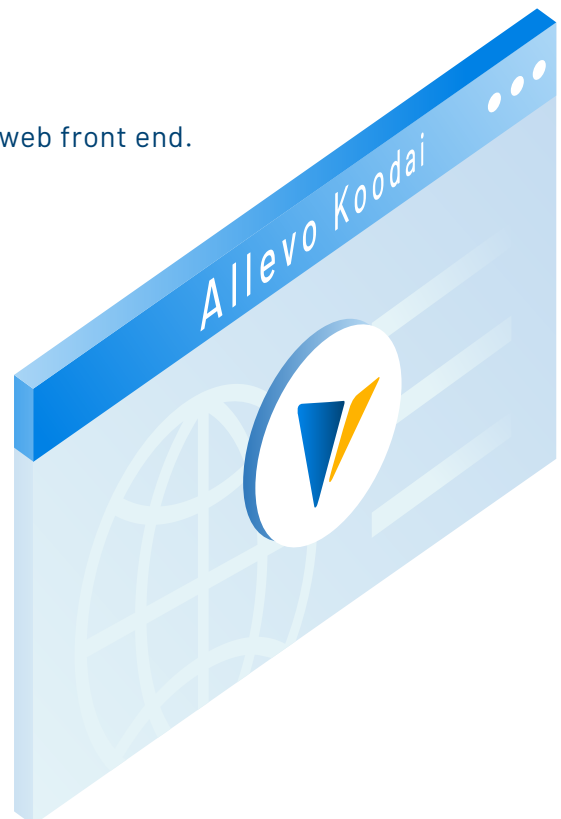

Web interface for SAP

Work SAP compliant based on an intuitive web frontend

With the help of Allevo Koodai, an intuitive web interface is created that, like Allevo Junan, communicates bidirectionally with SAP. This allows you to work in an SAP-compliant manner without having to open SAP itself.

- Make your SAP processes accessible to many users.
- Create a customized dashboard for the user interface.
- Integrate your Excel sheets, such as specialist planning.
- Benefit from the ability to create your own columns with graphics and formulas.
- Use the formula function to plan columns.
- Define your own user views.
- Work efficiently thanks to fast performance.
- As an Allevo customer, you can easily switch to the web front end.
